SUMMARY

Full-Stack Developer with 3+ years of experience building scalable web applications, SaaS platforms, and Web3 solutions. Proven ability to deliver end-to-end products using modern JavaScript frameworks, cloud infrastructure, and AI technologies. Founder experience with strong ownership mindset and ability to ship fast.

EXPERIENCE

Honeypot Finance

Full-Stack Engineer | 2024 - Present

- Developed and maintained Web3 DeFi applications using React, Next.js, and TypeScript
- Led frontend architecture decisions and implemented responsive, high-performance UIs
- Built smart contract integrations and blockchain features for decentralized finance platforms
- Collaborated with cross-functional teams to deliver features under tight deadlines
- Designed marketing campaigns including point systems and KOL partnerships for token events

Cuckoo Games

Front-End Developer | 2022

- Built interactive game UI components using React with focus on performance and UX
- Implemented responsive designs and smooth animations for gaming interfaces
- Optimized frontend performance for real-time interactive gaming experiences

PROJECTS

PlotEngine — AI Writing Assistant SaaS

Built an AI-powered writing platform using Next.js, TypeScript, OpenAI API, and PostgreSQL. Features AI story generation, plot tools, Google OAuth, and cloud storage. Designed modular, scalable architecture.

Career Builder / Personal Skill Map (personalskillmap.com)

Skill visualization platform for career path mapping and professional development tracking. Built with React, Node.js, MongoDB. Features interactive dashboards and data visualization.
